PROJECTS (SEE PORTFOLIO)

DATASTRUCTAR

2025

UI-UX DESIGNER | FULL-STACK DEVELOPER

DataStructAR is a marker-based augmented reality learning app that uses interactive 3D models to visualize and manipulate data structures like arrays, linked lists, stacks, and queues. Designed for Android, it supports hands-on, visual learning to make complex computer science concepts easier to understand.

AI THINK SO!

2025

UI-UX DESIGNER | FRONT-END DEVELOPER

Generate smart, topic-based quizzes in seconds using AI. Whether testing knowledge, hosting a trivia night, or just having fun, this tool makes it effortless to create, share, and play quizzes with anyone, anywhere.

SIMPLYFI

2025

UI-UX DESIGNER | FRONT-END DEVELOPER

A budgeting dashboard that helps users manage income and expenses with AI-generated financial insights. It features responsive design and real-time data visualization.

UPPA

2025

UI-UX DESIGNER

A budgeting dashboard that helps users manage income and expenses with AI-generated financial insights. It features responsive design and real-time data visualization.

LECHOWN

2024

UI-UX DESIGNER

U location-based mobile app that connects renters with nearby accommodations—boarding houses, apartments, and condos—making it easy to find and manage rentals.

1081

2024

UI-UX DESIGNER | FRONT-END DEVELOPER

A top-down educational stealth game set in Cebu, Philippines during Former President Ferdinand Marcos Sr. regime.

BABY IDE

2023

UI-UX DESIGN

A custom integrated development environment tailored for the Sisiw programming language, complete with run, compile, file I/O features, and syntax highlighting.
